WORK EXPERIENCE

GoCrayons Digital Inc.

Silang, Cavite

Intern (Game Development & Website Auditing)

2025

- Developed multiple 2D game prototypes in Godot Engine utilizing strict OOP principles to ensure scalable and clean codebases.
- Designed fluid gameplay mechanics, responsive user interfaces, and intuitive user interaction systems for target audiences.
- Conducted comprehensive UX/UI audits on client websites, delivering detailed functionality reports that enhanced visual appeal and user retention.

SKILLS

Programming Languages

Dart, Python, JavaScript, TypeScript, HTML, CSS, C#

Frameworks & Libraries

Flutter, React, Tailwind CSS, Node.js, Express, Godot Engine

Technologies & Tools

Git, GitHub, MySQL, PostgreSQL, Firebase, Google Maps API, Vercel, Postman

PROJECTS

Mobile Booking / Taxi App for Trike Vehicle (Bukqueue)

2024 - 2025

Flutter, Dart, Firebase, Google Maps API

- Led development of a mobile booking application designed to bring app-based ride booking to tricycle and bukryo transportation in remote areas, improving accessibility and booking speed similar to mainstream ride-hailing platforms.
- Implemented map-based pickup and drop-off selection, routing, and zone restrictions using Google Maps API to support accurate navigation in rural locations.
- Built a real-time booking and driver queuing system using Firebase to ensure fair driver allocation and reduced passenger wait times.
- Developed secure user flows including OTP-based authentication, driver onboarding and verification, and profile management to support production-level deployment.

Interactive Resume (Game-Style Resume)

2025

JavaScript, HTML, CSS

- Developed a personal portfolio website presented as a game-based interactive experience.
- Built a custom mini-engine from scratch to manage collision detection, camera control, game loop, and animations.
- Demonstrated both web development and game programming skills through interactive navigation and dynamic visuals.

Kuro (Lost & Found Pets)

2026 - Present

React, Tailwind CSS, Node.js, Express, TypeScript, PostgreSQL

- Developing a full-stack platform for reporting lost pets, utilizing React for a dynamic frontend and Express for a scalable API
- Implementing a type-safe API using Express and TypeScript, utilizing generic request handlers and Zod for strict data validation.
- Architecting a modular backend with a clear separation of concerns.
- Designing a relational database schema in PostgreSQL to efficiently store pet metadata, user profiles, and location-based data.

EDUCATION

City College of Tagaytay

2021 – 2025

Bachelor of Science in Information Technology

CERTIFICATIONS

- 11th TOPCIT Philippines 2024
- 10th TOPCIT Philippines 2024
