

CHRISTIAN JOHN R. TORRES

+639694918492 | christiantorres0418@gmail.com | github.com/torutilla | Tagaytay City, Cavite

Summary

Passionate about technology with a strong foundation in software development and hands-on experience from academic projects. Skilled in building mobile apps, games, and system applications. Eager to contribute to meaningful projects, grow continuously, and gain valuable experience in the tech industry.

Work Experience

GoCrayons Digital Inc.	Silang, Cavite
<i>Intern (Game Development & Website Auditing)</i>	2025
- Created and explored projects using the Godot engine, applying object-oriented programming (OOP) principles. - Designed and prototyped simple 2D games, focusing on gameplay mechanics and user interaction. - Reviewed client websites to assess usability, design, and functionality. - Provided actionable recommendations to improve website performance, user experience, and visual appeal.	

Education

City College of Tagaytay	
<i>Bachelor of Science in Information Technology</i>	2021 - 2025
Francisco P. Tolentino Integrated High School	
<i>Senior High School - Accountancy, Business and Management</i>	2018 – 2020
Francisco P. Tolentino Integrated High School	
<i>Junior High School</i>	2014 - 2018

Skills

Languages

Dart, Python, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries

Flutter, React, Tailwind, Node.js, Express, Godot Engine, Flame Engine

Technologies & Tools

Git/GitHub, MySQL, Firebase, REST API, Google Maps API, Vercel, Arduino

Soft Skills

Attention to Detail, Adaptability, Time Management, Committed

Projects

Mobile Booking / Taxi App for Trike Vehicle (Bukqueue)	
<i>(Flutter/Dart, Firebase, Google Maps API)</i>	2024 - 2025
- Served as the main programmer for a mobile booking app in Flutter, designed for Bukyo Transportation in Tagaytay City. - Integrated Google Maps API to pin locations and implement zoning restrictions. - Utilized Firebase for real-time data fetching, authentication and ensuring seamless user experience. - Developed features for booking, queueing, OTP login, driver verification, and profile management.	

Interactive Résumé (Game-Style)

(JavaScript, HTML, CSS) 2025

- Developed a personal portfolio website presented as a game-based interactive experience.
- Built a custom mini engine from scratch to manage core systems including collision detection, camera control, game loop, and animation handling.
- Showcased both web development and game programming skills through interactive navigation and dynamic visuals.

Website Portfolio

(React, TypeScript, GSAP, Tailwind) 2025

- Built a modern, responsive portfolio website using React and TypeScript, focusing on clean structure and reusable components.
- Integrated GSAP animations to enhance interactivity and deliver smooth, engaging user experiences.
- Showcased front-end development skills with attention to performance, accessibility, and maintainable code architecture.

2D Game Projects (Internship)

(Godot) 2025

- Designed and developed multiple 2D game prototypes using the Godot engine, including a platformer, top-down exploration, and custom mechanics-based games.
- Implemented core gameplay systems such as player movement, collisions, enemy logic, and scene transitions.
- Applied object-oriented programming and event-driven logic to manage game flow and interactions. Focused on gameplay design, user interaction, and prototyping within a collaborative team environment.

Point of Sale & Inventory System (Save Me POS)

(Visual Basic, MySQL) 2023

- Developed a basic Point-of-Sale and Inventory System using Visual Basic for the front-end.
- Utilized MySQL as the database to manage inventory and transaction data.
- Implemented SQL triggers to automate updates and maintain data integrity.

Game Controller (Arduino GamePad)

(Arduino, Python) 2025

- Built a simple hardware setup using Arduino to receive serial input from a joystick and buttons.
- Developed a Python script to read serial data and convert joystick and button inputs into keyboard presses.
- Used Tkinter to create a GUI for real-time key mapping adjustments and COM port management.

Certifications

11th TOPCIT Philippines 2024

10th TOPCIT Philippines 2024
